Swing Door Merchandiser

Glass Door Merchandisers
 Refrigerators

Model : TGM-5R

≡ FEATURES & BENEFITS ≡

■ **Double pane glass doors with Low-E glass**

Energy saving double pane glass doors are equipped with Low-emissivity glass, which reduce outer heat gain and decrease energy consumption. It enhances energy efficiency and minimizes condensation. Lightweight door construction also reduce door maintenance and bushing wear, which in turn facilitates smoother door openings.

■ **Efficient refrigeration system**

Turbo Air's glass door refrigerators are designed with oversized and balanced (CFC Free R-134A) refrigeration systems. These include efficient evaporators and condensers for faster cooling and greater efficiency.

■ **Adjustable, heavy duty, PE (polyethylene) coated wire shelves**

■ **Tasteful and modern appearance**

The design of our products is one of our top priorities. Whether you have a restaurant, bar, convenience store or gas station, Turbo Air refrigerators will compliment the appearance of your operation.

■ **Magnetic door gaskets**

Magnetic door gaskets are of one piece construction, removable without tools for ease of cleaning and replacement.

■ **High-density polyurethane insulation**

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

■ **Ergonomically designed doors**

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

■ **Bottom mount compressor units**

Turbo Air's bottom mount compressor allows easier access for service and extra storage space above. In addition, the lower area provides a cooler and less greasy operating environment which results in reduced compressor running time.

■ **Refrigerator holds 33°F ~ 38°F for the best in beverage preservation**
